DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
2. The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
3. Claims 1 and 3-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for catalyst compositions formed by mixing specific chromium compounds, does not reasonably provide enablement for catalyst compositions formed by mixing any chromium compound. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. The Specification in last full paragraph at the bottom of page 2 teaches various chromium compounds that may be suitable. Applicant has provided no other guidance as to suitable compounds and the reviewed prior art appears to provide no guidance as well. It is unclear how one of ordinary skill in the art would identify additional compounds. Moreover, as is intrinsic in chemical properties, it would be expected to be in the realm of undue experimentation to identify new catalytically behaving mixtures, guidance for which finding has not been provided.
4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
5. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1775

6. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Regarding Claims 1 and 3, it is unclear what is meant by the phrase "at least one aryloxy compound." In view of the later description of the possible values of n, it is unclear how n can assume the value of 2 and the described compound be properly characterized as an aryloxy compound.
8. Regarding Claim 2, it is unclear what is meant by the phrase "and alkoxy and aryloxy anions." Is the first "and" superfluous?
9. Regarding Claim 5, it is unclear how the compound "ethylaluminum sesquichloride" is encompassed by the formula of Claim 1.
10. Regarding Claim 10, it is unclear what is the admitted prior art process. The claim does not appear to recite those process steps that are admitted prior art steps.

Claim Objections

11. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 is not further limiting with respect to the compound "ethylaluminum sesquichloride."

This compound does not appear to be encompassed by the formula set forth in Claim 1.

Allowable Subject Matter

12. The subject matter of the catalyst composition of Claim 2 is not taught or suggested by the prior art of record and not taught or suggested by the reviewed prior art. Particularly, an aryloxy compound of an element M in combination with the other claimed limitations is not taught or suggested.
